ZANDRA GONZALEZ THARP

San Antonio, TX 78252 | +1 210 480 8042 | zandra_tharp2012@live.com

Professional summary

Data Engineering professional with 15+ years of experience in enterprise data, SQL, Python, ETL/ELT, data architecture, and automation. Proven ability to build scalable data solutions that drive measurable business results.

Authorized to work in the US for any employer

Work experience

Enterprise Business Intelligence Manager

Aviat Networks | San Antonio, TX

February 2021 to Present

- Designed and implemented a partitioned enterprise database supporting 200+ concurrent users, optimizing query performance and automating backup and recovery.
- Migrated enterprise data workloads to Databricks and implemented a Bronze/Silver/Gold medallion architecture for scalable data ingestion, transformation, data quality, and analytics.
- Designed and implemented enterprise data pipelines and SCD processes preserving years of historical data and automating Sales and Billing reconciliation, eliminating days of manual work each month.
- Developed 3 custom web applications and 15+ executive Power BI dashboards, improving KPI visibility, reporting accuracy, and forecast analysis.
- Designed and deployed a private enterprise LLM environment on Linux, integrated with internal databases and historical data to enable natural-language querying and automated reports and summaries.
- Designed a company wide stage gate process and led a team using Agile/Scrum to deliver 25+ enterprise projects from concept through production contributing to documented cost savings and > 1M in additional annual revenue.
- Performed data integration for two acquisitions, supporting the operationalization of $54M in acquired revenue.

Data Scientist

Apple Inc | Austin, TX

October 2019 to February 2021

- Engineered Python and SQL based data solutions and automation to analyze AppleCare warranty data and identify fraud patterns. I improved fraud detection workflows, contributing to approximately $1M in savings in FY20 Q1.
- Developed automated data processing scripts and analytical models using Python and SQL reducing manual analysis and improving the consistency and scalability of fraud detection processes.
- Standardized fraud detection procedures and data workflows, improving data quality and efficiency across the fraud analytics function.
- Built Tableau dashboards and reporting solutions that transformed complex datasets into actionable insights enabling business partners to monitor fraud trends and make data driven decisions.
- Collaborated cross functionally to improve data collection and data quality processes, strengthening the underlying data used for fraud detection and prevention.
- Used GitHub to manage analytical code and automation development supporting version control and repeatable data workflows.

Senior Technical Advisor

Apple Inc | Austin, TX

July 2018 to February 2021

- Delivered technical support across iOS, macOS, and Windows platforms, consistently achieving over 95% customer satisfaction and 90% issue resolution rates from Q1 to Q3 2019.
- #1 AppleCare Advisor award in Q1 2019.
- I crafted over 100 technical standard operating procedures and engineering forum solutions, enhancing support processes and knowledge sharing.
- By mentoring first-level advisors, I elevated team performance to achieve over 90% customer satisfaction, enabling a collaborative and high-performing environment.

AREA OPERATIONS MANAGER

Epic Health Services | Austin, TX

August 2015 to May 2018

- Managed operations across five locations in Austin and San Antonio, Texas including 150 employees to drive efficiency and revenue growth. By analyzing business structures and applying innovative marketing strategies, I achieved a 200% revenue increase and a 10% reduction in labor costs, earning Employee of the Year 2015.
- I enhanced processes by developing automation scripts using Yaml, Python, JSON, and SQL, streamlining tasks like employee onboarding and reporting.

RETAIL SALES CONSULTANT

AT&T | Austin, TX

November 2010 to August 2015

- Delivered sales and technical support
- I achieved a #1 sales position nationwide, exceeding sales targets by over 125% and sustaining above 90% customer satisfaction from 2010 to 2015, earning the prestigious National Summit Award in 2014 among other recognitions.
- My ability to address customer needs with clear solutions and maintain high performance under pressure strengthened client relationships and drove business success.

Education

Computer Science (Associate)

AUSTIN COMMUNITY COLLEGE | Austin, TX

August 2016 to May 2019

Skills

Cloud & Tools: Azure, AWS, Azure DevOps, Power BI, Tableau, Git/GitHub, Jenkins, Docker, Salesforce, Oracle EBS, Power Automate

Technical documentation

Databases: SQL Server, Oracle, MySQL, DB2, PostgreSQL, Azure SQL, Database Backup/Recovery, Indexing, Query Optimization

Lean Six Sigma

Data Engineering & Architecture: ETL/ELT, Data Modeling, SCD Types 1–3, Data Warehousing, Star/Snowflake Schemas, API Integrations, Data Pipelines, Automation, CI/CD, DevOps, Database Partitioning, Performance Tuning, Data Migration, Data Quality, Data Governance

Programming: SQL, Python, HTML/CSS, C# .NET, PowerShell, VBA, JSON, YAML, C++, .NET, ASP.NET Core, Flask, XML

Leadership: Agile/Scrum, Team Management, Project Leadership, Requirements Gathering, Cross-functional Collaboration

Power BI **Generative AI** **Software testing** **AI** **Continuous improvement** **Healthcare**

Languages

English - Fluent
Spanish - Fluent
