Work experience

Enterprise Business Intelligence Manager

Aviat Networks • San Antonio, TX

February 2021 to Present

- Led and provided technical and operational leadership to a team of 5 software engineers, coordinating priorities, delivery timelines, and cross functional collaboration across enterprise initiatives.
- Established a companywide stage gate governance process and led Agile project execution, delivering more than 25 enterprise initiatives from concept to production that generated documented cost savings and contributed over $1M in annual revenue.
- Directed the migration of the enterprise data warehouse from an on premises environment to Databricks, defining data governance standards through Unity Catalog and leading the implementation of scalable data pipelines that strengthened reporting, analytics, and enterprise decision making.
- Delivered 3 business applications and 15+ executive dashboards that enhanced visibility into key performance indicators, supported forecasting initiatives, and improved operational decision making.
- Championed the adoption of AI technologies by designing and deploying a secure internal platform that expanded access to business insights, reduced manual reporting effort, and improved productivity across teams.
- Led data and process integration efforts for two acquisitions, supporting the seamless incorporation of $54M in acquired revenue into existing business operations.

Data Scientist

Apple Inc • Austin, TX

October 2019 to February 2021

- Engineered Python and SQL based data solutions and automation to analyze AppleCare warranty data and identify fraud patterns. I improved fraud detection workflows, contributing to approximately $1M in savings in FY20 Q1.
- Developed automated data processing scripts and analytical models using Python and SQL reducing manual analysis and improving the consistency and scalability of fraud detection processes.
- Standardized fraud detection procedures and data workflows, improving data quality and efficiency across the fraud analytics function.
- Built Tableau dashboards and reporting solutions that transformed complex datasets into actionable insights enabling business partners to monitor fraud trends and make data driven decisions.
- Collaborated cross functionally to improve data collection and data quality processes, strengthening the underlying data used for fraud detection and prevention.
- Used GitHub to manage analytical code and automation development supporting version control and repeatable data workflows.

Senior Technical Advisor

Apple Inc • Austin, TX

July 2018 to February 2021

- Delivered technical support across iOS, macOS, and Windows platforms, consistently achieving over 95% customer satisfaction and 90% issue resolution rates from Q1 to Q3 2019.
- #1 AppleCare Advisor award in Q1 2019.

- I crafted over 100 technical standard operating procedures and engineering forum solutions, enhancing support processes and knowledge sharing.
- By mentoring first-level advisors, I elevated team performance to achieve over 90% customer satisfaction, enabling a collaborative and high-performing environment.

AREA OPERATIONS MANAGER

Epic Health Services • Austin, TX

August 2015 to May 2018

- Managed operations across five locations in Austin and San Antonio, Texas including 150 employees to drive efficiency and revenue growth. By analyzing business structures and applying innovative marketing strategies, I achieved a 200% revenue increase and a 10% reduction in labor costs, earning Employee of the Year 2015.
- I enhanced processes by developing automation scripts using Yaml, Python, JSON, and SQL, streamlining tasks like employee onboarding and reporting.

RETAIL SALES CONSULTANT

AT&T • Austin, TX

November 2010 to August 2015

- Delivered sales and technical support
- I achieved a #1 sales position nationwide, exceeding sales targets by over 125% and sustaining above 90% customer satisfaction from 2010 to 2015, earning the prestigious National Summit Award in 2014 among other recognitions.
- My ability to address customer needs with clear solutions and maintain high performance under pressure strengthened client relationships and drove business success.

Education

Computer Science (Associate)

AUSTIN COMMUNITY COLLEGE • Austin, TX

August 2016 to May 2019

Skills

Query Optimization **ASP.NET Core** **SQL** **Tableau** **Agile/Scrum** **SCD Types 1–3**

Programming: SQL, Python, HTML/CSS, C# .NET, PowerShell, VBA, JSON, YAML, C++, .NET, ASP.NET Core, Flask, XML

Azure SQL **Power BI** **Power Automate** **Requirements Gathering** **JSON** **Docker** **.NET** **DB2**

Cloud & Tools: Azure, AWS, Azure DevOps, Power BI, Tableau, Git/GitHub, Jenkins, Docker, Salesforce, Oracle EBS, Power Automate

Technical documentation **Git/GitHub** **Oracle EBS** **Oracle**

Leadership: Agile/Scrum, Team Management, Project Leadership, Requirements Gathering, Cross-functional Collaboration

XML **MySQL** **Database Backup/Recovery** **Data Migration** **ETL/ELT** **C# .NET** **API Integrations**

VBA **Project Leadership** **Power BI Generative AI Software testing** **CI/CD** **C++** **DevOps**

PowerShell **YAML** **Salesforce** **Data Pipelines** **Data Warehousing** **Lean Six Sigma** **Data Modeling**

Performance Tuning **Generative AI** **AWS** **Indexing** **Python** **Healthcare** **Data Quality**

Cross-functional Collaboration **Azure** **Team Management** **PostgreSQL** **Data Governance**

Databases: SQL Server, Oracle, MySQL, DB2, PostgreSQL, Azure SQL, Database Backup/Recovery, Indexing, Query Optimization

Flask Star/Snowflake Schemas Database Partitioning Automation

Data Engineering & Architecture: ETL/ELT, Data Modeling, SCD Types 1–3, Data Warehousing, Star/Snowflake Schemas, API Integrations, Data Pipelines, Automation, CI/CD, DevOps, Database Partitioning, Performance Tuning, Data Migration, Data Quality, Data Governance

HTML/CSS Azure DevOps Software testing AI SQL Server Jenkins Continuous improvement

Certifications

Relational Database Administration (DBA)

August 2025 to Present

The badge earner has demonstrated a foundational knowledge of Relational Database Administration. The earner can manage the operational aspects of database systems and maintain them. The individual can also configure and upgrade database server software and related products, as well as implement user authentication, assign roles, and perform backup and restore procedures. The earner can optimize databases for performance, monitor databases, collect diagnostic data, and access error information.

Certified Salesforce Administrator

April 2023 to Present
